**By developing conscious awareness

# What is Holding you back?

**WE can see, sense and search for the glories of the invisible world, the world of primeval cause, of limitless beauty just behind the screen of nature through the power of the mind within...extrasensory perception as men call it, intuition as women call it, and a hunch as gamblers call it (Lanto 9-24-67)**

## Eight Ways to increase your Creativity

1. Expanding your conscious awareness and intuition
2. Becoming sensitive to your body's wisdom
3. Integration of faculties/meditation
4. Developing your inferior personality function

## Eight Ways to Increase your Creativity

8. Acting on Divine Impulses

# What is consciousness?

# How is Intuition defined?

# Lady Kristine

*Intuition is the  
acceptance of  
grace through  
surrender of the  
lesser senses in  
deference to your  
higher faculties*

*10-10-07*

# Intuition Definition

- Direct Perception of Truth; untaught
- The art or faculty of knowing or sensing without the use of rational processes;
- Perceptive insight

***To access this deeper level of intuitive information, one requires a natural openness to such information, enhanced by practice and by learning to trust the validity of such experience ----  
Edgar Mitchell, Apollo 14 Astronaut***

***Through the power of the all-seeing eye of God you are able to see and reveal your consciousness for what it is (within or outside of God) which includes your shadow self that resides just below the level of our conscious awareness. As your mastery of the chakras and the aura grows, you are able to sense and get glimpses of your states of unconscious energies that may be transmuted and returned to higher use.***

# Become sensitive to your body's wisdom

Text

**Exercise:**  
**Exploring Nano-Awareness  
and Body Wisdom**  
*by Dr. Arnold Mindell*

Take a moment, feel your body,  
get in touch with your breath

# Now notice whatever little tiny body sensation is asking to be noticed

Notice the tiniest, subtlest little flickers or sensations that arise.

Now focus your whole attention, your whole awareness on that little thing. Track the sensations, letting them unfold as they will. Feel them, see them, hear them.

Do not stop how they are unfolding with your conscious doubts or explanations

Experiment with your nano-awareness (nano means one-billionth of a part of something)

Let the sensations unfold in a fanciful manner, until they have some meaning for you.

# Using the Five Secret Ray Energies

# The Archeai of the Five Secret Rays

- These intuitive graces are
- won through a heart-mind
- connection that goes beyond
- the norm of conscious
- awareness.....
- July 3, 2008

- 
- As an aspect of the mother-light from the night-side of being, the secret rays sculpt and mold one's being into the divine Christic pattern or blueprint

My heart is the  
sensitive,  
intuitive center  
of the cosmos  
which sends  
and receives  
love  
emanations  
that balances  
and sustains all  
life everywhere  
and in all forms

# Increase your Receptivity to the Holy Spirit

- through purification of the four quadrants of being

- The Wisdom of God
- and the Energies of the
- Christ Mind flow
- unobstructed through
- bodies that have been
- cleansed and purified
- from the pollutants
- of the world.

Pay attention to  
your unconscious -  
to your dreams,  
visions and  
hunches

Dreams and visions can be symbolic, archetypal, prophetic or compensatory - and they usually have a message if you'll give them enough attention - muse and meditate on the characters and images that show up in your psyche

**Let your creativity flow by  
receiving your divine intuition**

on Divine  
Impulse  
and
